

# Capability Statement

Examine was born out of a passion for unlocking value in mining businesses. With a team of experienced professionals, we offer a range of services aimed at helping businesses realise the true potential of their mining projects for the benefit of all stakeholders.

Examine's home base is Adelaide, South Australia. We are open pit mining specialists with experience developing resources from concept studies through to operations. At Examine we excel in these core competency categories, offering tailored solutions to mining businesses.

## Strategic Support

### STRATEGIC & LIFE OF MINE PLANNING SUPPORT

We collaborate with your team to develop and refine long-term strategies, facilitating well-informed decisions and ensuring alignment with overall project goals.

### TECHNICAL DUE DILIGENCE SUPPORT

We provide thorough mine engineering technical assessments to evaluate mining assets, helping clients make informed investment decisions.

## Operational Support

- Site secondments for technical services management & mine planning support positions.
- Mine planning, pit optimisation, design, and scheduling.
- Greenfields projects start up support.
- Peer review of planning processes, operational and strategic decisions

## Projects Support

### MINE PLANNING

We work with you to develop solutions for all study phases, from initial concepts through pre-feasibility and feasibility studies, ensuring cost effective and pragmatic planning solutions with transparency on risk.

### STUDY SUPPORT

We work with you to develop your project, ensuring you reach the confidence required at each stage for internal and external toll gating.

At Examine, we know that all mining projects are unique and understanding the full value chain is critical in unlocking the full potential of a resource. Strong relationships, high integrity and technical excellence are the pillars of our business and are the cornerstone of our customer service offering.

To ensure we deliver on our customer service promise, our mining engineers bring depth of experience (minimum +10 yrs) and a variety of skillsets to meet your needs and adapt as required.
